

Introducing our new Club Poker

Club Poker is here to give you an additional revenue stream and another wagering option for your players to enjoy.

Collect rake in Cash Games and Tournament Fees!

Since the player is not betting against the house, every week is a sure winner as you collect from all transactions!

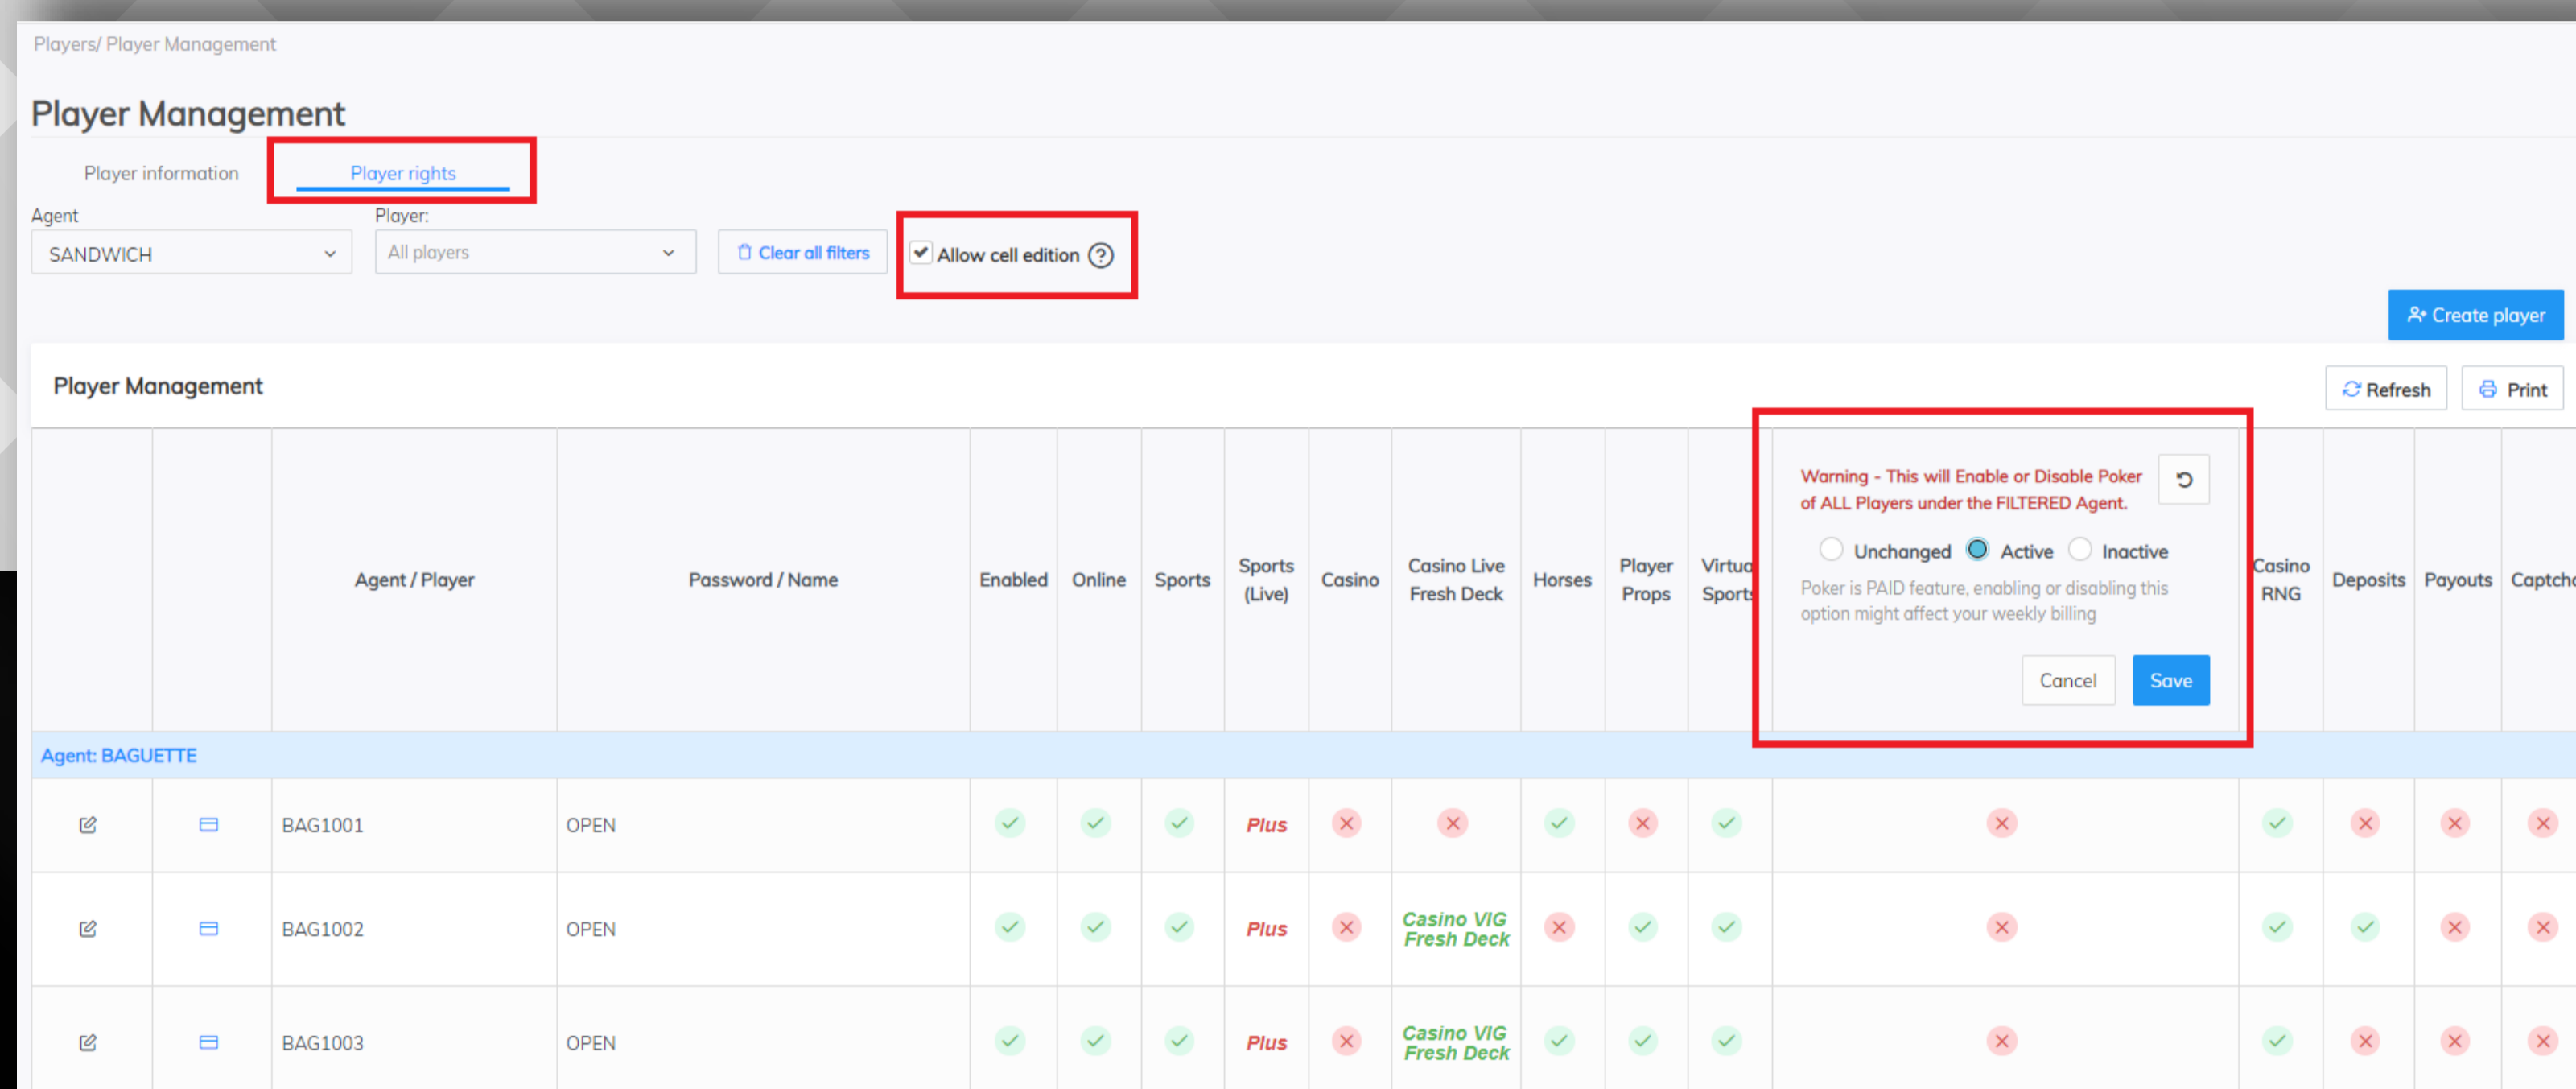

- Shared wallets and the automatic creation of cash tables make it easy for you! All you need to do is turn Poker on, and you are good to go!
- With our custom tables and customizable shared visibility, you can also control exactly how and with whom your players play.
- Ensure a steady income stream by encouraging your players to play! The more they play, the more you'll make!

Why should I offer Poker?

The previous COVID-19 Sports lockdown proved one thing; bookies need to diversify their product portfolio to hedge their chances and increase their profits. Club Poker gives your players an enticing reason to keep playing, regardless of what happens.

How can I enable Poker?

Turn on Poker for your players by going to the Player Management screen and enabling it on **Player Rights**.

Club Poker Features:

Shared Wallet

Your players' balances will be available to be transferred to Poker.

Plug and Play:

Automatic cash tables will be created whenever they access the Club. No setup required.

Buy-In Limits

You can set your players' Daily and Weekly Win and Loss limits by accessing **Maintenance - Limit Management**. These apply to amounts bought in and out of the poker tables, but they do not limit the wins/losses by hand within the table itself. Players will be blocked once they buy out with wins/losses above or equal to the limit you set.

Visibility Controls

Poker Clubs are isolated by subagent as a default, but you can create tables with shared visibility through our Customer Service team, so all the players under your hierarchy can play each other.

Custom Table Creation

Rake is set at 5% as a default, capped at 1 big blind per hand. However, we can create new custom tables should you want to have limits or table settings different than the default ones.

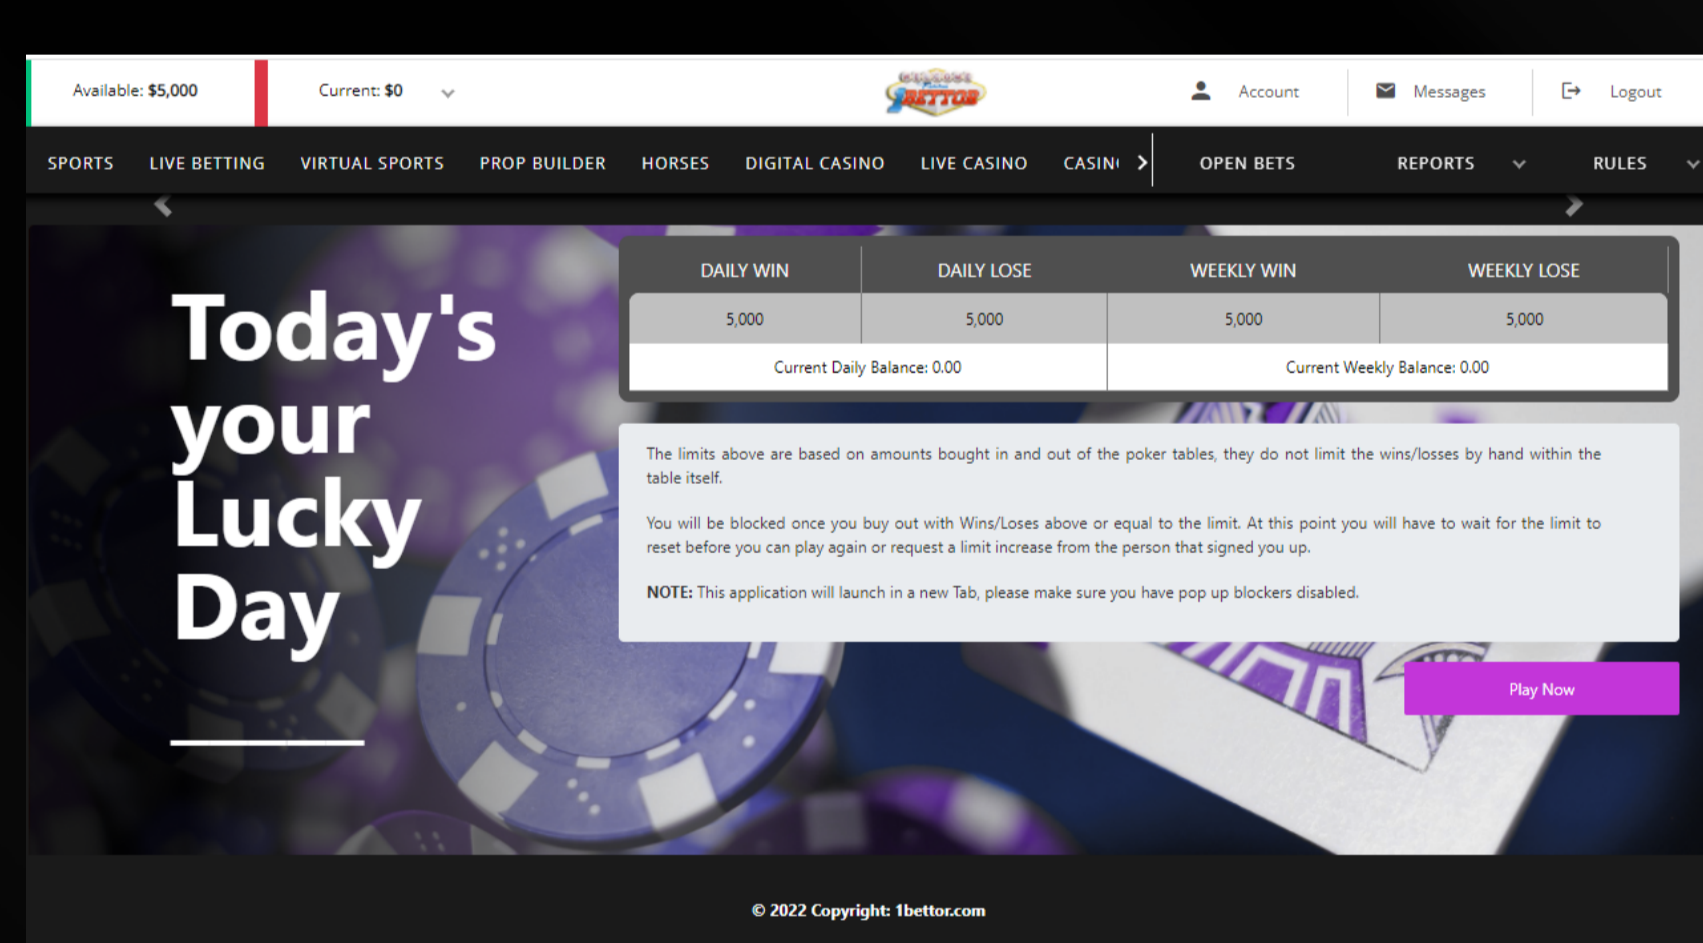

Integrated Reporting

Know how much your players win/lose, and how much rake they generate for you. Detailed hand histories are available upon request.

Poker Tournaments to be added shortly!

Streamlining your Poker Network!

Poker is a game of volume, which means that the more your players play, the better you will do! Players bet against each other, and you, as the house, rake in a commission on each table. In order to be profitable, you will want your players to generate as much activity as possible; which means that you'll have to make more payments and collections. Good news is: **WE CAN HELP YOU WITH THAT!**

Integrate our Agent Payment Solution to your Poker network to ensure that payments and collections are a breeze!

- Take payments from your players from anywhere, at any time, through Credit Card, Cryptocurrencies and MoneyGram.
- Keep them playing by receiving instant payments for credit increases.
- Pay your players out through Cryptos or MoneyGram.
- Our 2-Step verification process ensures that your funds are safe at all times. Only you have access to approve payouts and credit deposits.
- Increase your safety, and save time and effort by avoiding constant player/agent meetings.

Contact Customer Service to set up the Agent Payment Solution for your account.

We just made making money for your business easier. The agent payment system is now open for credit card, crypto and money gram deposits through player sites.
